2021/2022
PUBLISHING
CATALOGUE

THE NEED FOR GOOD BOOKS IS NOW MORE IMPORTANT THAN EVER.

JO RUNCIMAN
MANAGING
DIRECTOR

At Australian Geographic we celebrate Australia and our amazing native flora and fauna. We have also recently expanded our publishing program to include some of the world's most amazing and engaging animals. Our Children's Publishing Program, while mainly non-fiction and educational will surprise, delight and entertain.

Our greater non-fiction program ties very much into our mission to connect people back to nature. There is a strong focus on stunning photography and inspiring others to get back into our great outdoors and to explore, discover and enjoy our incredible natural world.

During such uncertain times nature heals all, and this is a theme that flows strongly throughout our publishing program.

Jo Runciman

INSPIRE READERS TO GET BACK INTO NATURE.

We find ourselves in unprecedented times, where people are searching for escapism and creative ways to keep their kids off their screens.

Our 2022 titles will inspire readers to get back into nature and to help our planet. Our new graphic series *Pip & Pete* is a perfectly timed launch that encourages children to focus on the positive aspects of climate action. We also have a wonderful offering of evergreen titles on all the amazing aspects of our planet that are well worth a look in.

Australian Geographic would love to partner with you and share our content with the world. We hope you enjoy our new releases!

ULTIMATE SURVIVOR

Animals are incredible! Did you know that one bat hibernated in someone's fridge for a whopping 344 days! WHAT?! How about platypuses who are waterproof and have just one (yes, just the one!) hole for poo-ing, peeing and giving birth? And let's not forget emperor penguins, who can survive -40 celcius while balancing with an egg on their feet. This book is a keeper!

THE INCREDIBLE BOOK OF AUSSIE INSECTS

BY JESSA THURMAN

This wonderful book will introduce you to the magnificent world of Australian insects. Overflowing with jaw-dropping facts, including a closer look at the love life of damselflys. For starters, did you know that the males of this fascinating species will move their sperm to a set of secondary genitalia before finding a female to mate with? There is no un-learning that!
